

## Distance Neuro Education for Parents/Carers

### WHAT IS NEURO EDUCATION?

Neuro Education is the term used to describe the utilization of the early movements of humankind for the benefit of children from 6 weeks of age, in relation to their physical, emotional/behavioural and intellectual abilities. In short – how to help your child excel at school age!!!

Toddler Kindy GymbaROO was established primarily to help parents help their child avoid difficulties in learning at school. However, some parents and their children live too far away from a Toddler Kindy GymbaROO Centre, so cannot attend due to distance.

In consideration for these parents, the following Starter packages have been collated for the benefit of these Parents/Carers and their children. The goal of Toddler Kindy GymbaROO is to provide Parents/Carers with enough of the essential materials to equip them to make a difference in their child's educational outcome. Once a Parent/Carer has commenced 'Distance Neuro Education' with their child they will then be able to choose from the next age package, any relevant items, they do not yet possess.

For some Parents/Carers, the resources may be shared with others in their area, thereby reducing their expenses.

### Each package includes;

- **Book:** 'Tomorrow's Children' for parents/carers by Margaret Sassé
- **First Steps Magazine:** 2 year subscription
- Activities (10) designed specifically for each age group package
- Articles from previous issues of First Steps. Age specific for each package
